

GLASS

Glass is an unlimited and innovative material that has plenty of applications

USES:

Glass is used in the following non-exhaustive list of products:

- Packaging
- Tableware
- Housing and buildings
- Automotives and transports
- Appliances and technologies

REUSE OR REPURPOSE:

- With an empty wine bottle, some wood, a few screws and a piece of wire rope, anyone with a little DIY know-how can construct this beautiful bird-feeder.

- Turn glass bottles of vinegar, juice, soda and other beverages with twist-off lids typically fit the average spray nozzle.
- Turn your old bottles into a beautiful vase for your favorite flowers.

- CandleStick Holder - Coat the glass bottle in gold paint and add a candle.
- Outdoor oil lamps- Glam up your home by upcycling your glass bottles into oil lamps.
- Table Lamp-Make a chic table lamp out of an upcycled glass bottle. Place a lamp shade on top of the bottle, plug in the shade, and there you are. The simplest lamp ever.
- Colorful Glass Chandelier-Hang the bottles around a round base, and place a light in the center. The different colored glass will reflect the light in beautiful ways.
