

WOOL

Wool is a natural and renewable resource. As long as there is grass to eat, sheep will continue to produce wool. When wool is disposed of, it degrades readily in as little as three to four months but the rate varies with soil, climate and wool characteristics, releasing valuable nutrients back into the earth.

USES:

Mostly wool is used in clothing like wool, In addition to clothing, wool has been used for blankets, horse rugs, saddle cloths, carpeting, insulation and upholstery.

REPURPOSE:

Instead of throwing it away, One can reuse the old sweaters by repurposing it in creative ways like-

- Turn out an old sweater into a pillow case. Decorate with buttons if you want, or make an envelope-style case.

- Knitted cozies, they help keep beverages hot in glass or ceramic mugs. Cut a strip of old sweater and attach with Velcro or a button to a Mason jar or coffee mug
- Turn an old sweater into snug boots by shaping and sewing the fabric over some old shoes.
- Convert your old wool blanket into- Wool Hot Water Bottle Cover
- One can also turn their wool blanket into a stylish bag.
- If you have an old sweater, a sewing machine, and an hour to spare, you can make yourself a new pom-pom hat with scissors, yarn and cardboard
